DEGREE OF BACHELOR OF ARTS

Syllabus for

B.A PUBLIC ADMINISTRATION

CHOICE BASED CREDIT SYSTEM

(SEMESTER PATTERN)

(For Candidates admitted in the Colleges affiliated to

Periyar University from 2023-2024 onwards)

INTRODUCTION

Public Administration is particularly suited to students to pursue a broad-based education giving scope for many multiple careers and meaningful lives, be it in politics, civil service, civil society organisations and businesses with commitment to social service, and new vocations that are in the making. Further it helps students who seek broad-based access to insights from multiple disciplines as a way to understand how people behave and influence the world around us. These students aspire to study social science as a holistic discipline which has practical relevance in understanding and tackling real problems in society.

The Bachelor_s Programme in Public Administration equips the students with knowledge of the Indian constitution, the political system, institutions, and their functioning besides giving an idea of how a government works at the central, state and local levels. The discipline of Public Administration studies government-in-action and has acquired salience and popularity among students, particularly those aspiring to make a career in the rapidly changing political economy of India today. The Indian Civil services are an alternative area of career planning for the students of Public Administration besides the ever-expanding private sector in post globalized India. The programme familiarizes the students with the complexities of state and bureaucratic functioning as well as policy making and implementation with reference to India. The students learn about the concepts and theories of administration/management and their application which is extremely relevant to the working of both public and private sector organizations.

The courses in this programme have been structured in a manner that they introduce the student to the canvas of subjects that comprise the umbrella discipline of Public Administration which has both theoretical and applied aspects. Beginning with a focus on concepts and theories which form the core courses, other courses are introduced to see how these concepts have been translated into Indian administrative practices. The transition from an era of government to governance has brought Public Administration to the forefront of seminal changes in the operational context of developed and developing countries in the 21stcentury. All these changes have been mapped to make the course relevant and meaningful to a student in today_s times. Given this diverse basket of courses and skill sets that a student is expected to master in this B.A. Programme, the learning outcome enable them to seek gainful employment and engagement in diverse sectors of the economy such as teaching and research, civil services, journalism, law or executive work in private sector organizations.
