

PERIYAR UNIVERSITY

PERIYAR PALKALAI NAGAR SALEM-636011

DEGREE OF BACHELOR OF SCIENCE

Syllabus for

B.Sc., INTERNET OF THINGS

(SEMESTER PATTERN- CBCS)

(For Candidates admitted in the colleges affiliated to

Periyar university from 2023-2024 onwards)

1. Introduction

B.Sc. Internet of Things

Education is the key to development of any society. Role of higher education is crucial for securing right kind of employment and also to pursue further studies in best available world class institutes elsewhere within and outside India. Quality education in general and higher education in particular deserves high priority to enable the young and future generation of students to acquire skill, training and knowledge in order to enhance their thinking, creativity, comprehension and application abilities and prepare them to compete, succeed and excel globally. Learning Outcomesbased Curriculum Framework (LOCF) which makes it student-centric, interactive and outcomeoriented with well-defined aims, objectives and goals to achieve. LOCF also aims at ensuring uniform education standard and content delivery across the state which will help the students to ensure similar quality of education irrespective of the institute and location.

Computer Science is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. throughout the world in last couple of decades and it has carved out a space for itself like any other disciplines of basic science and engineering. Computer science is a discipline that spans theory and practice and it requires thinking both in abstract terms and in concrete terms. Nowadays, practically everyone is a computer user, and many people are even computer programmers. Computer Science can be seen on a higher level, as a science of problem solving and problem solving requires precision, creativity, and careful reasoning. The ever-evolving discipline of computer science also has strong connections to other disciplines. Many problems in science, engineering, health care, business, and other areas can be solved effectively with computers, but finding a solution requires both computer science expertise and knowledge of the particular application domain. Computer science has a wide range of specialties. These include Computer Architecture, Software Systems, Graphics, Artificial Intelligence, Computational Science, and Software Engineering. Drawing from a common core of computer science knowledge, each specialty area focuses on specific challenges. Computer Science is practiced by mathematicians, scientists and engineers. Mathematics, the origins of Computer Science, provides reason and logic. Science provides the methodology for learning and refinement. Engineering provides the techniques for building hardware and software.

The Students completing this programme will be able to present Software application clearly and precisely, make abstract ideas precise by formulating them in the Computer languages. Completion of this programme will also enable the learners to join teaching profession, enhance

their employability for government jobs, jobs in software industry, banking, insurance and investment sectors, data analyst jobs and jobs in various other public and private enterprises.

| | COMES-BASED CURRICULUM FRAMEWORK GUIDELINES BASED EGULATIONS FOR UNDER GRADUATE PROGRAMME |
|---------------------|--|
| Programme: | B.Sc., Internet of Things |
| Programme Code: | |
| Duration: | 3 years [UG] |
| Programme Outcomes: | PO1: Disciplinary knowledge: Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate Programme of study PO2: Communication Skills: Ability to express thoughts and ideas effectively in writing and orally; Communicate with others using appropriate media; confidently share one's views and express herself/himself; demonstrate the ability to listen carefully, read and write analytically, and present complex information in a clear and concise manner to different groups. PO3: Critical thinking: Capability to apply analytic thought to a body of knowledge; analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development. PO4: Problem solving: Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one's learning to real life situations. PO5: Analytical reasoning: Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of sources; draw valid conclusions and support them with evidence and examples, and addressing opposing viewpoints. PO6: Research-related skills: A sense of inquiry and capability for asking relevant/appropriate questions, problem arising, synthesising and articulating; Ability to recognise cause-and-effect relationships, define problems, formulate hypotheses, test hypotheses, analyse, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the results of an experiment or investigation PO7: Cooperation/Team work: Ability to work effe |
| | of a group, and act together as a group or a team in the interests of a |

common cause and work efficiently as a member of a team

PO8: Scientific reasoning: Ability to analyse, interpret and draw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective.

PO9: Reflective thinking: Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society.

PO10 Information/digital literacy: Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources; and use appropriate software for analysis of data.

PO 11 Self-directed learning: Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion.

PO 12 Multicultural competence: Possess knowledge of the values and beliefs of multiple cultures and a global perspective; and capability to effectively engage in a multicultural society and interact respectfully with diverse groups.

PO 13: Moral and ethical awareness/reasoning: Ability to embrace moral/ethical values in conducting one's life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demon starting the ability to identify ethical issues related to one"s work, avoid unethical behaviour such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual property rights; appreciating environmental and sustainability issues; and adopting objective, unbiased and truthful actions in all aspects of work.

PO 14: Leadership readiness/qualities: Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way.

PO 15: Lifelong learning: Ability to acquire knowledge and skills, including "learning how to learn", that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to changing trades and demands of work place through knowledge/skill development/reskilling.

Programme Specific Outcomes:

PSO1: To enable students to apply basic microeconomic, macroeconomic and monetary concepts and theories in real life and decision making.

PSO 2: To sensitize students to various economic issues related to Development, Growth, International Economics, Sustainable Development and Environment.

PSO 3: To familiarize students to the concepts and theories related to Finance, Investments and Modern Marketing.

PSO 4: Evaluate various social and economic problems in the society and

develop answer to the problems as global citizens.

PSO 5: Enhance skills of analytical and critical thinking to analyze effectiveness of economic policies.

3 – Strong, 2- Medium, 1- Low

Highlights of the Revamped Curriculum:

- ➤ Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Mathematics based problem solving skills are included as mandatory components in the _Training for Competitive Examinations' course at the final semester, a first of its kind.
- ➤ The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- ➤ The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.

- ➤ The Internship during the second year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- > State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest Artificial Intelligence.

Value additions in the Revamped Curriculum:

| Semester | Newly introduced Components | Outcome / Benefits |
|-----------------|---|--|
| I | Foundation Course To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning Literature and analysing the world through the literary lens gives rise to a new perspective. | Instill confidenceamong students Create interest for thesubject |
| I, II, III, IV | Skill Enhancement papers (Discipline centric / Generic / Entrepreneurial) | Industry readygraduates Skilled human resource Students are equippedwith essential skills to make them employable Training on language and communication skills enable the students gain knowledge and exposure in the competitive world. |
| | | Discipline centric skill will improve the Technical knowhow of solving real life problems. |
| III, IV, V & VI | Elective papers | Strengthening thedomain knowledge Introducing thestakeholders to theState-of Art techniquesfrom thestreams ofmultidisciplinary, cross disciplinary and inter disciplinary nature Emerging topics inhigher education/industry/ communication network / health sectoretc. are introduced with hands-on-training. |

| IV | Elective Papers | Exposure to industry moulds students into solution providers Generates Industryready graduates Employment opportunities enhanced |
|----------------|----------------------------|--|
| V Semester | Elective papers | Self-learning isenhanced Application of the concept to real situationis conceived resulting in tangible outcome |
| VI Semester | Elective papers | Enriches the studybeyond the course. Developing a researchframework and presenting their independent and intellectual ideaseffectively. |
| Extra Credits | | To cater to the needs ofpeer learners / |
| For Advance | d Learners / Honors degree | research aspirants |
| Skills acquire | ed from the Courses | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill |

List of Experiments:

- 1. Data acquisition using Multimeter and oscillographic recorder
- 2. Connect an LED to GPIO pin 25 and control it through the command line.
- 3. Connect an LED to GPIO pin 24 and a Switch to GPIO 25 and control the LED with the switch.
- 4. The state of LED should toggle with every press of the switch Use DHT11 temperature sensor and print the temperature and humidity of the room with an interval of 15 seconds
- 5. Use joystick and display the direction on the screen
- 6. Use Light Dependent Resistor (LDR) and control an LED that should switch-on/off depending on the light.
- 7. Create a traffic light signal with three colored lights (Red, Orange and Green) with a duty cycle of 5-2-10 seconds.
- 8. Switch on and switch of a DC motor based on the position of a switch.
- 9. Convert an analog voltage to digital value and show it on the screen.
- 10. Create a door lock application using a reed switch and magnet and give a beep when the dooris opened.
- 11. Control a 230V device (Bulb) with Raspberry Pi using a relay.

- 12. Control a 230V device using a threshold temperature, using a temperature sensor.
- 13. Create an application that has three LEDs (Red, Green and white). The LEDs should follow the cycle (All Off, Red On, Green On, White On) for each clap (use sound sensor).
- 14. Create a web application for the above applications wherever possible with suitable modifications to get input and to send output.

| CO | Course Outcomes |
|-----|--|
| CO1 | Recognize the fundamental concepts of solid state devices |
| CO2 | Understand the types and characteristics of various rectifiers, filtersand regulators. |
| CO3 | Apply the operation of the devices on various amplifier designs |
| CO4 | Illustrate the functionality of different kinds of oscillator and waveshaping circuits |
| CO5 | Analyze the characteristics of the Linear IC"s in different aspects. |

List of Exercises

Do the following 8 exercises for any project projects (Eg. Student Portal, Online exam registration)

- 1) Development of problem statement.
- 2) Preparation of Software Requirement Specification Document.
- 3)Preparation of Software Configuration Management and Risk Management related documents.
- 4) Draw the entity relationship diagram
- 5) Draw the data flow diagrams at level 0 and level 1
- 6) Draw use case diagram
- 7) Draw activity diagram of all use cases.
- 8) Performing the Design by using any Design phase CASE tools.
- 9) Develop test cases for unit testing and integration testing
- 10) Develop test cases for various white box and black box testing techniques

| | TOTAL | 75 |
|-----|---|------------------|
| CO | Course Outcomes | |
| CO1 | An ability to use the methodology and tools necessary for engineering practice. | |
| CO2 | Ability to elicit, analyze and specify software requirements. | |
| CO3 | Analyze and translate specifications into a design. | |
| CO4 | Ability to derive test cases for different testing. | |
| CO5 | Apply software engineering perspective through requirements analysis, software design ar verification, and validation to develop solutions to modern problems | nd construction, |

| I | Introduction: Modernizing Project Management: Project Management Needed a Makeover – Introducing Agile Project Management. Applying the Agile Manifesto and Principles: Understanding the Agile manifesto – Outlining the four values of the Agile manifesto – Defining the 15 Agile Principles – Adding the Platinum Principles – Changes as a result of Agile Values – The Agile litmus test. Why Being Agile Works Better: Evaluating Agile benefits – How Agile approaches beat historical approaches – Why people like being Agile. | | | | | | 1 | 2 | | | |
| II | II Being Agile Agile Approaches: Diving under the umbrella of Agile approaches – Reviewing the Big Three: Lean, Scrum, Extreme Programming - Summary Agile Environments in Action: Creating the physical environment – Low-tech communicating – High-tech communicating – Choosing tools. Agile Behaviours in Action: Establishing Agile roles – Establishing new values – Changing team philosophy. | | | | | | | 1 | 2 | | |

| Agile Planning and Execution Defining the Product Vision and Roadmap: Agile planning — Defining the product Vision — Creating a product roadmap — Completing the product backlog. Planning Releases and Sprints: Refining requirements and estimates Release planning Sprint planning. Working Throughout the Day: Planning your day — Tracking progress — Agile roles in the sprint — Creating shippable functionality — The end of the day. Showcasing Work, Inspecting and Adapting: The sprint review — The sprint retrospective. Preparing for Release: Preparing the product for deployment (the release sprint) — Preparing the operational support — Preparing the organization for product deployment - Preparing the marketplace for product deployment Managing Scope and Procurement: What's different about Agile scope management — Managing Agile scope — What's different about Agile procurement — Managing Agile procurement. Managing Time and Cost: What's different about Agile time management — Managing Agile budgets. Managing Team Dynamics and Communication: What's different about Agile cost management — Managing Agile team dynamics — What's different about Agile communication: Managing Quality and Risk: What's different about Agile quality — Managing Agile quality — What's different about Agile quality — Managing Agile quality — What's different about Agile quality — Managing Agile promation: Organizational and individual commitment — Choosing the right pilot team members — Creating and environment that enables Agility — Support Agility initially and over time. Being a Change Agent: Becoming Agile requires change — why change doesn't happen on its own — Platinum Edge's Change Roadmap — Avoiding pitfalls — Signs your changes are slipping. Benefits, Factors for Success and Metrics: Ten key benefits of Agile project anagement — Ten key factors for project success — Ten metrics for Agile Organizations. Total Course Outcomes CO On completion of this course, students will Understanding of software design, software technologies | | | |

| UNIT | Details | | | | | | No. of Hours | | Course Objective | | | |
| I | Introduction: Introduction, brief history, components of robotics, classification, workspace, work-envelop, motion of robotic arm, endeffectors and its types, service robot and its application, Artificial Intelligence in Robotics. | | | | | | 6 | | (| CO1 | | |
| II | Actuators and sensors: Types of brushless motors- model of a DC spurpose of sensor-internal and encoders tachometers-strain gauproximity and distance measuring Kinematics of robots: Representatransformation, homogeneous minverse kinematics: two link plans Mobile robot Kinematics: Different | servo motor external so age based sensors ation of joi atrix, D-H ar (RR) and | r-typensor for nts a ma | es of r-corce and atrix, | f trar nmo torqu fram Fo al ro | nsmissions- n sensors- ne sensor- nes, frames rward and | | 6 | | (| CO2 | |

| III | Localization: Self-localizations and mapping - Challenges in localizations - IR based localizations - vision based localizations - Ultrasonic based localizations - GPS localization systems. | 6 | CO3 | | |
|-----|--|------------|--------------|--|--|
| IV | Path Planning: Introduction, path planning-overview-road map path planning-cell decomposition path planning potential field path planning-obstacle avoidance-case studies Vision system: Robotic vision systems-image representation-object recognition-and categorization-depth measurement- image data compression-visual inspection-software considerations | 6 | CO4 | | |
| V | Application: Ariel robots-collision avoidance robots for agriculture-mining-exploration-underwater-civilian- and military applications-nuclear applications-space Applications-Industrial robots-artificial intelligence in robots-application of robots in material handling-continuous arc welding-spot welding-spray painting-assembly operation-cleaning-etc. | 6 | CO5 | | |
| | Total | | | | |
| | Course Outcomes | Pro | ogramme | | |
| | | O | utcomes | | |
| CO | On completion of this course, students will | | | | |
| 1 | Describe the different physical forms of robot architectures. | | PO1 | | |
| 2 | Kinematically model simple manipulator and mobile robots. | PC | PO1, PO2 | | |
| 3 | Mathematically describe a kinematic robot system | PC | 04, PO6 | | |
| 4 | Analyze manipulation and navigation problems using knowledge of coordinate frames, kinematics, optimization, control, and uncertainty. | PO4, | PO5, PO6 | | |
| 5 | Program robotics algorithms related to kinematics, control, optimization and uncertainty. | n, PO | 03, PO8 | | |
| | Text Book | l. | | | |
| 1 | RicharedD.Klafter. Thomas Achmielewski and MickaelNegin, Robo Integrated Approach, Prentice Hall India-Newdelhi-2001 | otic Engin | eering and | | |
| 2 | SaeedB.Nikku, Introduction to robotics, analysis, control and application edition 2011 | ons, Wiley | -India, 2 nd | | |

| LO5 | To understand Organisational O | Change, Conf | flict | and | l Po | owe | r | | | | | |
| UNIT |] | Details | | | | | | | N | No. of 1 | Hours | |
| I | INTRODUCTION: Concept of Organizational Behavior (OB): Nature, Scope and Role of OB: Disciplines that contribute to OB; Opportunities for OB (Globalization, Indian workforce diversity, customer service, innovation and change, networked organizations, work-life balance, people skills, positive work environment, ethics) | | | | | | | | | 6 | | |
| II | INDIVIDUAL BEHAVIOUR: 1. Learning, attitude and Job satisfaction: Concept of learning, conditioning, shaping and reinforcement. Concept of attitude, components, behavior and attitude. Job satisfaction: causation; impact of satisfied employees on workplace. 2. Motivation: Concept; Theories (Hierarchy of needs, X and Y, Two factor, McClelland, Goal setting, Self-efficacy, Equity theory); Job characteristics model; Redesigning jobs, 3. Personality and Values: Concept of personality; Myers-Briggs Type Indicator (MBTI); Big Five model. Relevance of values; Linking personality and values to the workplace (person-job fit, person-organization fit) 4. Perception, Decision Making: Perception and Judgements; Factors; Linking perception to individual decision making: | | | | | | | | | 6 | | |
| III | GROUP BEHAVIOUR: 1. Groups and Work Teams: Concept: Five Stage model of group development; Group norms, cohesiveness; Group think and shift; Teams; types of teams; Creating team players from individuals and team based work(TBW) 2. Leadership: Concept; Trait theories; Behavioral theories (Ohio and Michigan studies); Contingency theories (Fiedler, Hersey and Blanchard, Path-Goal); | | | | | | | | | 6 | | |
| IV | ORGANISATIONAL CULTURE AND STRUCTURE: Concept of culture; Impact (functions and liability); Creating and sustaining culture: Concept of structure, Prevalent organizational | | | | | | | | | 6 | | |

| | designs: New design options | | | | | | | |
|--|--|--------------|----|--|--|--|--|---|
| V | ORGANISATIONAL CHANGE, CONFLICT AND POWER: | | | | | | | |
| | Forces of change; Planned change; Resistance; Approaches (Lewin's model, Organisational development); Concept of 6 | | | | | | | |
| | | | | | | | | conflict, Conflict process; Types, Functional/ Dysfunctional. |
| | Introduction to power and politics. | | | | | | | |
| | | | 30 | | | | | |
| Course | On Completion of the course the students will | | | | | | | |
| Outcomes | On Completion of the course the students win | | | | | | | |
| CO1 | To define OrganisationalBehaviour, Understand the opportunity through | ugh OB. | | | | | | |
| CO2 | To apply self-awareness, motivation, leadership and learning theories at | | | | | | | |
| COZ | workplace. | | | | | | | |
| CO3 | To analyze the complexities and solutions of group behaviour. | | | | | | | |
| CO4 | To impact and bring positive change in the culture of the organisaiton. | | | | | | | |
| CO5 To create a congenial climate in the organization. | | | | | | | | |
