1. Introduction

B.Sc. Psychology: Programme Outcome, Programme Specific Outcome and Course Outcome

Psychology is the scientific study of mind and behaviour. It is a broad and diverse field with many career options for the students. This course forms the foundation for the students aspiring to specialize in various fields such as education, hospital, industrial, forensic, and many more. The key core areas of study in Psychology include general psychology, developmental psychology, social psychology, abnormal psychology and experimental psychology. This programme helps learners in building a solid foundation for higher studies in Psychology. In addition students are equipped with skills that facilitate employment. The Bachelor's Degree B.Sc. Psychology is awarded to the students on the basis of knowledge, understanding, skills, attitudes, values and academic achievements expected to be acquired by learners at the end of the Programme. Learning outcomes of Psychology are aimed at facilitating the learners to acquire these attributes, keeping in view of their preferences and aspirations for gaining knowledge of Psychology.

LEARNING OUTCOMES-BASED CURRICULUM FRAMEWORK							
GUIDE	ELINES BASED REGULATIONS FOR UNDER GRADUATE						
PROG	PROGRAMME						
Programm	U.G.						
e :							
Programme							
Code:							
Duration:	3 years [UG]						
Programme	PO1: Disciplinary knowledge: Capable of demonstrating						
Outcomes:	comprehensive knowledge and understanding of one or						
	more disciplines that form a part of an						
	undergraduate Programme of study						
	PO2: Communication Skills: Ability to express						
	thoughts and ideas effectively in writing and orally;						
	Communicate with others using appropriate media;						
	confidently share one's views and express						
	herself/himself; demonstrate the ability to listen						
	carefully, read and write analytically, and present						
	complex information in a clear and concise manner to						
	different groups.						
	PO3: Critical thinking: Capability to apply analytic						
	thought to a						

body of knowledge; analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development.

PO4: Problem solving: Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one's learning to real life situations.

PO5: Analytical reasoning: Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of sources; draw valid conclusions and support them with evidence and examples, and addressing opposing viewpoints.

PO6: Research-related skills: A sense of inquiry and capability for asking relevant/appropriate questions, problem arising, synthesising and articulating; Ability to recognise cause-and- effect relationships, define problems, formulate hypotheses, test hypotheses, analyse, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the results of an experiment or investigation

PO7: Cooperation/Team work: Ability to work effectively and respectfully with diverse teams; facilitate cooperative or coordinated effort on the part of a group, and act together as a group or a team in the interests of a common cause and work efficiently as a member of a team

PO8: Scientific reasoning: Ability to analyse, interpret and draw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective.

PO9: Reflective thinking: Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society.

PO10 Information/digital literacy: Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources; and use appropriate software for analysis of data.

PO 11 Self-directed learning: Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion.

PO 12 Multicultural competence: Possess knowledge of the values and beliefs of multiple cultures and a global perspective; and capability to effectively engage in a multicultural society and interact respectfully with diverse groups.

PO 13: Moral and ethical awareness/reasoning: Ability to embrace moral/ethical values in conducting one's life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demon starting the ability to identify ethical issues related to one"s work, avoid unethical behaviour such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual property rights; appreciating environmental and sustainability issues; and adopting objective, unbiased and truthful actions in all aspects of work.

PO 14: Leadership readiness/qualities: Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way.

PO 15: Lifelong learning: Ability to acquire knowledge and skills, including "learning how to learn", that are necessary for participating in learning activities throughout life, through self- paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to changing trades and demands of work place through knowledge/skill development/reskilling.

Programme Specific Outcomes:

PSO1: To enable students to apply basic microeconomic, macroeconomic and monetary concepts and theories in real life and decision making.

PSO 2: To sensitize students to various economic issues related to Development, Growth, International Economics, Sustainable Development and Environment.

PSO 3: To familiarize students to the concepts and theories related to Finance, Investments and Modern Marketing.

PSO 4: Evaluate various social and economic problems in the society and develop answer to the problems as global citizens.

PSO 5: Enhance skills of analytical and critical thinking to analyze effectiveness of economic policies.

Highlights of the Revamped Curriculum:

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with vivavoce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- ➤ The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- ➤ The General Studies and Mathematics based problem solving skills are included as mandatory components in the 'Training for Competitive Examinations' course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- ➤ The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.
- ➤ The Internship during the second year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and to narrow down and focus on the career path.

- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- > State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest Artificial Intelligence.

Course Outcomes:

On successful completion of the course, students will be able to

- **CO1 (K1)** Acquire knowledge on the history, methods and special areas in the field of Psychology
- **CO2 (K3)** Explain sensory systems through which information processing happens
- CO3 (K4) Relate the process of attention to perception and infer how we make sense of the world around us
- **CO4 (K5)** Critically examine the process of learning
- **CO5 (K1, K4)**Gain insight into complex emotional experiences of human being and analyse the experience of self in day to day life.

On successful completion of the course, students will be able to

CO1 (K2) Describe recent research methods and perspectives on the emerging field of

Behavioural neuroscience and the reciprocal relationship between brain and behaviour.

- CO2 (K2) Understand anatomy and functions of the basic cell of the nervous system and explain the process of communication between neurons
- **CO3 (K4)**To understand and analyse the regulations of internal body states. **CO4 (K1, K4)** To understand the function of endocrine glands and relate the knowledge to

Analyse various human behaviour.

CO5 (K2) Describe the complex orchestrated functioning of the nervous system describe the manifestation of biological deficits in behaviour.

Objectives of the

Course

- To provide an overview of the human development stages from conception to babyhood.
- To understand the characteristics of early childhood at physiological domain.
- To analyse the emotional development of childhood and socialization process.
- To examine the characteristics of late childhood at physiological domain, challenges of development.
- To provide various perspectives to explain cognitive and personality development in early childhood.

Course Outline

UNIT I: CONCEPTION THROUGH BIRTH

Meaning of developmental changes – Significant facts about development – Developmental stages – Developmental Issues – Conception of Age. Characteristics of the Prenatal Period – How Life begins

- Importance of Conception Periods of
 Conception Periods of Prenatal development –
 Stages of child Birth
- Types of childbirth Attitudes of significant people -

Prenatal hazards & complications of low birth weight.

UNIT II: INFANCY

Characteristics of Infancy, developmental tasks-Major adjustment of Infancy – Conditions influencing adjustment to Postnatal life – Characteristics of the Infant – Hazards of Infancy.

UNIT III: BABYHOOD

Characteristics of Babyhood – Developmental tasks of babyhood – Physical development – Physiological development – Muscle Control – Speech development

Emotional behaviour – Socialization – Interest in Play

Development of Understanding – Beginnings of Morality – Beginnings of Sex-Role typing – Family Relationships – Personality development – Hazards and Happiness.

UNIT IV: EARLY CHILDHOOD

Characteristics of Early Childhood –
Developmental tasks – Physical development –
Physiological habits – Skills of Early Childhood –
Improvement in Speech – Emotions – Socialization
– Play – Development of Understanding – Moral development – Common Interests – Sex-role
Typing – Family Relationship – Personality development – Hazards and Happiness.

UNIT V: LATE CHILDHOOD

Characteristics of Late Childhood –
Developmental tasks – Physical development –
Skills – Speech improvement – Emotions and
Emotional Expressions – Social groupings and
Social behaviour – Play interest and activities –
Increase in Understanding – Moral attitudes and
behaviour – Interests – Sex-role Typing –
Changes in Family relationships – Personality
Changes – Hazards and Happiness.

Questions related to the above topics, Extended from various Professional competitive examinations UPSC / TRB / NET / UGC -CSIR / GATE / TNPSC /others to be solved Component (is a part of internal (To be discussed during the Tutorial hour) component only, Not to be included in the External Examination question paper)

COURSE OUTCOMES:

- CO1 **(K2)**: To describe and discuss the various physical changes and emotionality during adolescence.
- CO2 **(K2,K4)**: To analyse and understand the changes in morality, sex interest and family relationships in adolescence.
- CO3 **(K5)**: To discuss and evaluate the personal and social hazards of early adulthood.
- CO4 **(K4)**: To identify and critically analyse the vocational and marital adjustments made by early adults.
- CO5 **(K2)**:To understand the cognitive and personality development.

COURSE OUTCOMES

- CO1(K2) To distinguish between normal & abnormal behavior and outline the historic view of abnormal psychology.
- CO2 (K2) To understand the classification and diagnosis of abnormal behaviour.
- CO3 (K1)-To outline the common intellectual disability syndromes.
- CO4 (K4) To elucidate various somatoform and Dissociative disorders
- CO5 (K5)- To analyze the causes and treatment of addiction.

Course O		Unit I: Ba Definition descriptiv population sampling. question, i variable, c question, s conclusion Variables a constant, c Scales of N and their o scale, inter measurem treatment. Measure o mean, med transform sampling o numbers,- Unit II: Or Frequency constructi apparent v distributio	of been standard of stationard of certain of the ce	asic constitution, in the constant stical constant stical constant stical stical stical and probability and probability cores.	cepts - nferenti rameter istics - r variable variable nclusion procedu ts - Mean able, con t - Scales cs - non tio scale olems of dency - p e - effect teristics using tal alitativ n - group d freques - relativ	sta al st r, ran e, see e, de e, sta n, res ning ntinu s of ran is of ran ble control ble of red s ncy or	of votos scales scare ando of ra	dent cal ch variable, variable. surement le, ordinal cof cal sof e om ndom

Percentiles and Percentile ranks - percentile point, percentile rank, computing percentiles from grouped data computation of percentile rank.

Graphical representation of frequency distribution - Abscissa, ordinate, zero point on a graph, histogram, frequency polygon, bar diagram, pie chart, cumulative percentage curve - factors affecting the shape of graphs-shape of frequency distributions - J shaped distribution, skewed distribution, kurtosis, rectangular distribution, bimodal distribution, bell shaped distribution.

Variability and Standard (Z) scores - Measure of variability - range and semi interquartile range-calculation of the variance and standard deviation - raw score method - standard scores (Z) scores - comparison of z scores and percentile ranks. Standard scores and the normal curve - nature of normal curve - standard normal curve - finding scores when the area is known.

Unit III: Parametric analysis - Basic concepts and assumptions

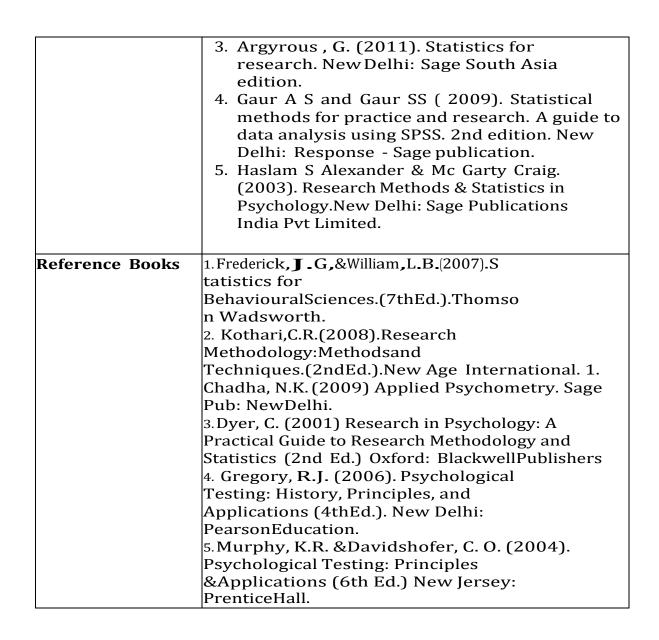

Correlation, scatter diagram, product moment correlation coefficient- calculating r from raw scores- rank order correlation coefficient-cautions concerning correlation coefficients.

Prediction - basics of regression, regression line - regression equation - criterion of best fit-error of prediction - standard error of estimate-interpretation of correlation and regression.

t distribution - characteristics of student's distribution oft, degrees of freedom and student's distribution of t, computing t from raw scores, levels of significance vs p values

One way analysis of variance- within group and between group variations - variance estimates and the F ratio- Post Hoc comparisons - alternative to F test - planned comparisons - ANOVA for repeated measures - factorial

analysis for two factor design for independent groups , ftest. Chi - square test for goodness of fit- interpretation of the outcome of a chi square test. Unit IV: Non parametric analysis - Assumption -Free tests Randomization tests- rank order test - Mann -Whitney Utest - sign test - Wilcoxon's signed ranks test Kruskal - Wallis test - Friedman's rank test. Qualitative data analysis - Basic concepts percentage analysis, content analysis, narrative analysis, thematic analysis. **Unit V: Statistical methods using software** SPSS data editor, SPSS viewer, importing and exporting data, alternatives to spss, data entry in spss, assigning a variable naming, sorting the data type, defining variable table, defining value tables, slotting missing values, data cleaning, working with large data set, software for qualitative data analysis. Extended Questions related to the above topics, from Professional various competitive examinations UPSC / TRB / Component (is a NET / UGC partof CSIR / GATE / TNPSC /others to be intern solved (To be discussed during the Tutorial hour) component only, Notto be included in the External Examination question paper) Skills acquired Knowledge, Problem Solving, Analytical ability, fromthis Professional Competency, Professional course Communication and Transferrable Skill Recommended 1. King, B.M. and Minium E W. (2011). Text Statistical Reasoning in the Behavioural Sciences . 5th Edition. New Delhi: Wiley student India edition. 2. Aron A, Aron E N and Coups E J. (2007). **Statistics** for Psychology. New Delhi: Pearson Education.

Course Outcomes:

On successful completion of the course, the students will be able to

CO1 (K2) To understand and define statistics as a specialization to be used for behavioural research and explain the difference between descriptive and inferential statistics.

CO2 (K3) To recognize measurements as being one of the four scales and to understand that not all numbers can be treated alike and to understand measure of central tendency and to calculate it.

CO3 (K3) To organize scores into a frequency distribution in table form, construct a cumulative frequency distribution and a relative cumulative frequency distribution and to compute percentiles and percentile ranks. CO4 (K4) To analyze and interpret raw data using various parametric and non-parametric methods

CO5 (K5) To compile data using various software analysis.

Course Outcomes

- CO1(K6)-Experiment and Assess human attributes such as perception, attention, personality, intelligence, thought and attitudes through standardized tests.
- CO2 (K2)- Demonstrate skills in administering and scoring assessment measures.
- CO3 (K5)-Demonstrate competence in drawing inferences from the results without bias.
- CO4 (K6)-Demonstrate competence in writing a standard report.
- CO5 (K5)- Make observation, interpret and use the data obtained from measurement to analyse individual differences in human capacities

Objectiv Course	the	 To offer the students a comprehensive overview of Social Psychology. To comprehend the development and vicissitudes of Social Cognition. To gain insight into the formation and management of Social Perception. To develop understanding of attitudes and persuasion To learn of the dynamics of close interpersonal relationships. 						
Course	Outline	UNIT I: INTRODUCTION TO SOCIAL PSYCHOLOGY Definition of Social Psychology, History, Research method in Social Psychology, Social Psychology in new millennium.						

UNIT II: SOCIAL COGNITION

Definition of social cognition; Schemas -Meaning, Impact of schemas on social cognition, Priming, Schema persistence; Heuristics - Meaning, Representativeness, Availability, Anchoring and adjustment; Potential sources of error in social cognition.

UNIT III: SOCIAL PERCEPTION

Definition of social perception; Non-verbal communication - Basic channels; Deception - Meaning. Non-verbal cues to identify deception; Attribution - Definition, Theories of attribution - Correspondent inference, Kelley's theory of causal attribution; Basic sources of error in attribution. Impression formation, Impression

management.

UNIT IV: ATTITUDES

Attitudes - Meaning, Types, Formation of attitudes - Classical conditioning. Instrumental conditioning, Observational learning; Strength of attitudes, Change in attitude - Persuasion, cognitive processes underlying persuasion, Resisting persuasion attempts, Cognitive dissonance, Dissonance and attitude change.

UNIT V: INTERPERSONAL ATTRACTION AND **CLOSE RELATIONSHIPS**

Meaning of interpersonal attraction, Internal determinants of attraction, External determinants of attraction; Romantic relationships and falling in love -Romance, Selecting a potential mate, Love, Jealousy, Marital happiness, Causes of relationship failure.

Objective	the	 To define and outline the evolution and scope of cognitive psychology. To outline various theories of pattern recognition and explain language development, comprehension and understand disorders of language. To outline the various theories of attention and perceptual disorders. To compare the differences between short term, long term and working memory. To illustrate the different types of problem solving strategies, and the application of different types of reasoning. 					nderstand short oblem	
Course (Jutiine	Unit I: Introduction Definition - Information Processing Approach - Growth of Cognitive Psychology - Cognition's relation to other fields - Research methods in Cognitive Psychology.						on's

Unit II: Pattern Recognition, Language
Pattern recognition - Template Theories - Feature
Theories - Structural Theories - Information

Processing stages - Partial Report Technique -Spelling's model - word

recognition - word superiority effect - neural network model.

Language - language systems, speech sounds, words and morphemes, sentence level, sentence comprehension, language production, disorders of language - aphasia, dyslexia.

Unit III: Attention, Disorders of perception and attention

Attention – Definition – Factors influencing attention – Theories of attention - Bottleneck theories - Broadbent's filter model - Treisman's attenuation model - Deutsch- Norman Memory selection model - Automatic Processing and Applications - Cognitive Neuroscience of Attention - Posner's theory of the neural bases of attention.

Overview of Disorders of perception and attention - synaesthesia, blindsight, unilateral spiral neglect, visual agnosia, prosopagnosia.

Unit IV: Memory

Forgetting - Decay theory - Interference theory - cue dependent forgetting - inhibition - retrieval induced forgetting - directed forgetting - imagination and false memory - Individual differences in chunking - Acoustic codes and rehearsal- Acoustic codes in reading - Recognition of items in short term memory - types of amnesia.

Working memory - Baddeley's revised working memory model.

Long term memory - Atkinson-Shiffrin model - Verbal rehearsal and learning - Rehearsal and serial position effect - meta cognition - Mnemonic Techniques - method of loci, the pegword technique, key word technique, organizational technique - tip of the tongue phenomenon - Improving eyewitness recall and identification-episodic and semantic memory - autobiographical memory - Flashbulb memory - the cue-word method.

Unit V: Reasoning , Problem solving

Reasoning - Logical reasoning - Analogical reasoning - Scientific reasoning - Deductive reasoning, Inductive reasoning, Propositional reasoning, Syllogistic reasoning, Conditional reasoning- Venn diagrams - Creative thinking.

	Problem solving - Types of problems - problem solving strategies - mean end analysis - reasoning by analogy - transformational problems - incubation - problem solving experts - block to problem solving - types of heuristics.
Extended Professional Component (is a part of intern al component only, Notto be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this Course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

Course outcomes:

On the successful completion of the course, students will be able to:

CO1 (K1) Recognize the applications of cognitive processes in various areas of human

Development.

CO2 (K2) Distinguish the different discords of language and comprehend the stages of

human language development and also identify different perspectives of pattern

recognition.

C03 (K2) Explain the process of attention and identify various perceptual disorders.

CO4 (K4) Recognize and examine the process of remembering and forgetting.

CO5 (K5) Examine the different types of reasoning and demonstrate various problem

solving strategies.
